Each year, more union members are assassinated in Colombia thanin the rest of the world combined and over 4 million Colombians have been forced out of their homes. In 2008, murders of union members rose 25% and forced displacements rose 41%. An indigenou person is assassinated at the rate of one every day, and a unionist, one every three days, mostly by military or paramilitary troops. Still, the US supplies Colombia with millions of dollars in military aid each year. Colombia also has over 7,200 political prisoners, most arrested on the basis of false, paid, and/or anonymous testimony. All this is part of a crackdown on dissent by the administration of Pres. Álvaro Uribe so that Colombia's land and resources can be sold to and developed by transnational corporations without impediment.

Even with improved labor and human rights, a US-Colombian FTA would destroy family and sustainable farms in both countries much as NAFTA has hurt farming communities in the US, Canada, and Mexico. We demand a JUST PEACE, not repression for the sake of corporate profits. NO MORE MILITARY AID TO COLOMBIA AND NO FTA!
